

Enhance Your Resistance Training

Cable Extension Kit

The Power Plate® Cable Extension Kit is intended to "extend" your workout by adding length to the proMOTION™ resistance cables of the my7™, pro6+™, or pro7™. This kit is designed to securely change the height and line of pull to suit any position or direction of resisted tension. Use our Cable Extension Kit to add resistance both on and off the platform. The Cable Extension Kit can be used on its own or together with the Cable Accessory Kit.
